

# Shipment Execution

Transporeon Shipment Execution helps you assign and organize freight on a global scale. Eliminate manual communication effort and transmit shipment data either at contracted freight rates or on the spot market within a closed carrier pool. Optimize your logistics processes and automatically assign freight to the ideal partner under the best conditions.

## Transporeon Features:

- **AUTOMATED ALLOCATION**  
 Predefined allocation guidelines automate shipment assignment to carriers and reduce the amount of manual communication effort
- **AUTOMATED COST CONTROL**  
 With one mouse click, all shipments can be assigned to selected carriers at contracted freight rates
- **SIMPLIFIED COST OPTIMIZATION**  
 Assigning shipments to a closed carrier pool makes it possible to optimize costs through a lowest-price award strategy
- **SYSTEM INTERFACES**  
 Due to an extensive number of system interfaces, Transporeon guarantees smooth data exchange to virtually any system
- **COMPLIANT DOCUMENTATION**  
 Documentation of all steps with time stamp, as well as reporting and export functions
- **WORLDWIDE AVAILABILITY**  
 The cloud-based platform provides worldwide access to your shipment execution and logistics management
- **HOMOGENEOUS SYSTEM**  
 A unified system for all parties involved enables a quick and uncomplicated exchange between shipper and carrier

## Industry Challenges:

- » **No central system of record:**  
 Different regional transportation management systems at different locations means lack of shipment transparency, making it difficult to effectively control shipment execution
- » **Time-consuming manual assignment process:**  
 Manual communication involves a time-consuming process of correspondence between shippers and carriers
- » **Lack of market transparency:**  
 Shippers often find it difficult to compare market prices and choose the right carriers with available capacity

► **Fast and accurate shipment execution**

**Shipment Execution**

**How it works:**

1. Shipment is created on the cloud-based platform
2. Shipment is sent to a closed pool of carriers and the best offer is selected  
and / or
3. Shipment is assigned at contracted freight rates to a list of predefined carriers
4. The selected carrier receives the freight order while taking the assignment guidelines into account

**Benefits**

- » Administrative effort is reduced to a minimum and processes are significantly accelerated
- » Guaranteed compliance within assignment guidelines through automatic Shipment Execution documentation
- » Worldwide support in 23 languages across all time zones
- » Quick and easy integration into existing company infrastructure
- » A platform availability of 99.7% ensures permanent access to your shipment data

“Transporeon allowed for a higher level of transparency and the ability to build a controlled strategy for the transportation spend of the business.”
