

PRODUCT DATA SHEET

TRANSPORT ASSIGNMENT

The Transporeon Transport Assignment assists you with assignment and organisation of your freight on a global scale. With intelligent transport allocation, you can eliminate manual communication effort and transmit shipment data either at contracted freight rates or as a spot tender within a closed carrier pool. With Transport Assignment, you can optimise your logistics processes and automatically assign freight to the ideal partner under the best conditions!

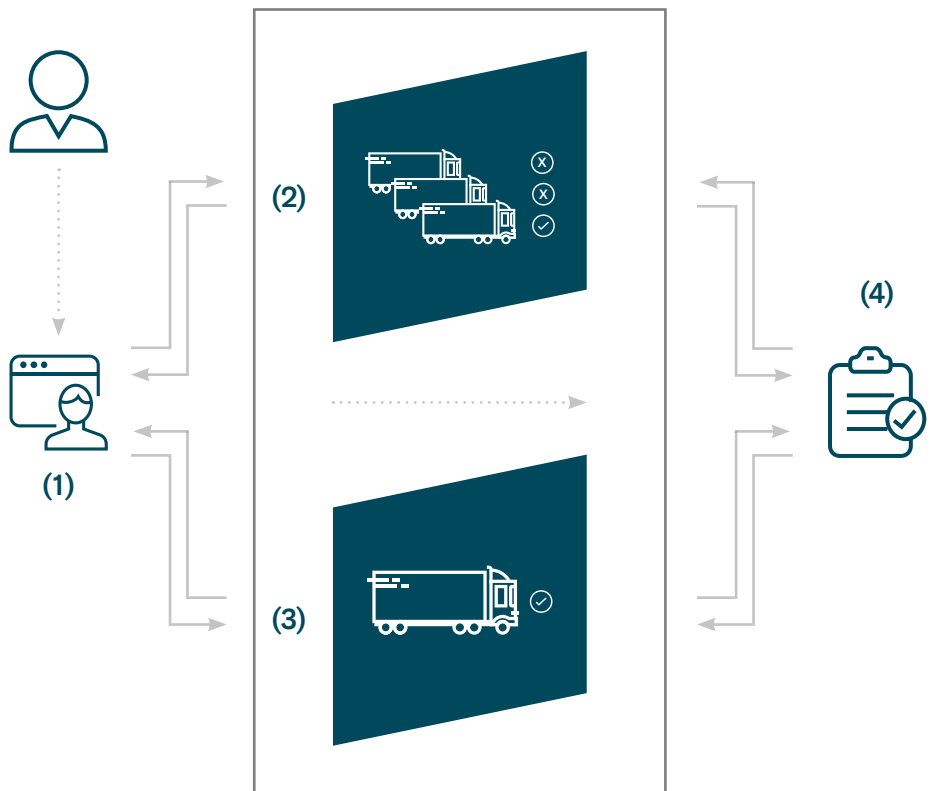

Challenges:

- **Significant capacity fluctuations**
Regional and seasonal capacity fluctuations lead to declines and higher shipping costs.
- **Lack of market transparency**
Shippers often find it difficult to compare market prices and choose the right carriers with free capacity.
- **Time-consuming award process**
Manual communication involves a time-consuming process of correspondence between shippers and carriers.
- **Compliance within award guidelines**
Due to inexperience or lack of knowledge, award guidelines are often not adhered to.
- **No central overview**
Different regional transport management systems at different locations make it difficult to control transport allocation.

Features:

-  **AUTOMATED COST CONTROL**
With one mouse click all transports can be assigned to selected carriers at contracted freight rates
-  **SIMPLIFIED COST OPTIMISATION**
The tendering of transports to a closed carrier pool makes it possible to optimise costs through a lowest-price award strategy
-  **AUTOMATED ALLOCATION**
Predefined allocation guidelines automate the assignment of transports and reduce the amount of manual communication effort
-  **SYSTEM INTERFACES**
Due to an extensive number of system interfaces, Transporeon guarantees smooth data exchange to virtually any system
-  **COMPLIANT DOCUMENTATION**
Documentation of all steps with time stamp, as well as reporting and export functions
-  **WORLDWIDE AVAILABILITY**
The cloud-based platform provides worldwide access to your transport assignment and logistics management
-  **HOMOGENEOUS SYSTEM**
A unified system for all parties involved enables a quick and uncomplicated exchange between shipper and carrier

Fast and accurate Transport Assignment

HOW IT WORKS:

1. User creates a transport on the cloud-based platform
2. Transport is tender to a closed pool of carriers and the best offer is selected and / or
3. Transport is assigned at contracted freight rates to predefined carriers
4. The selected carrier receives the order while taking the award guidelines into account

"Thanks to Transporeon, we can have more carriers in our pool. Transport prices are lower and now we have no problems finding a carrier to deliver our goods. Also, our daily communication has improved and the information transfer is faster."

– Miklós Papp, Logistics Manager by Mondi Bags

Benefits

- ✓ Administrative effort is reduced to a minimum and processes are significantly accelerated
