

SAP TM Integration

An SAP Transportation Management (SAP TM) system offers enormous added value in transportation planning and processing. However, the connection and access to transport service providers are not included. In addition, many shippers do not have the capacity to set up their own support system in order to provide full support to carriers in various languages. With the Transporeon interface, you can solve the problems and benefit from the world's leading logistics network.

CHALLENGES

NO CENTRAL CONNECTION TO THE CARRIER

Shippers cannot rely on a central network of carriers, making it difficult to assign transports to the right carrier under the right conditions. Communication with carriers can only take place via a direct connection, which requires high maintenance and expensive implementation – all without any guarantee of permanent availability.

INTENSE COORDINATION AND ONBOARDING PROCESS

The onboarding of each individual carrier and providing support in several languages causes an enormous increased effort for shippers, which often cannot be adequately managed. In addition, coordination with carriers is often delayed due to contact difficulties and absence of a single, standardised communication channel.

LACK OF MARKET TRANSPARENCY

Shippers generally do not know which trucks are running empty near their loading points, diminishing this enormous savings potential due to a lack of market transparency and time. Therefore, manual transport allocation often cannot be achieved under the best possible conditions.

FEATURES

LEADING LOGISTICS NETWORK

With over 120,000 connected carriers, Transporeon's cloud-based transport management platform is the world's leading logistics network. Benefit from the synergies and network effects that Transporeon offers you with its more than 1,300 shippers.

REDUCED PROJECT EFFORT

Quick setup of an SAP TM interface to reach all your carriers. With the Transporeon network, you can have access to over 120,000 carriers.

ONBOARDING AND SUPPORT

Transporeon provides full support. If one of your carriers is not in our network, we handle outreach and onboarding, and take care of support – in 25 languages.

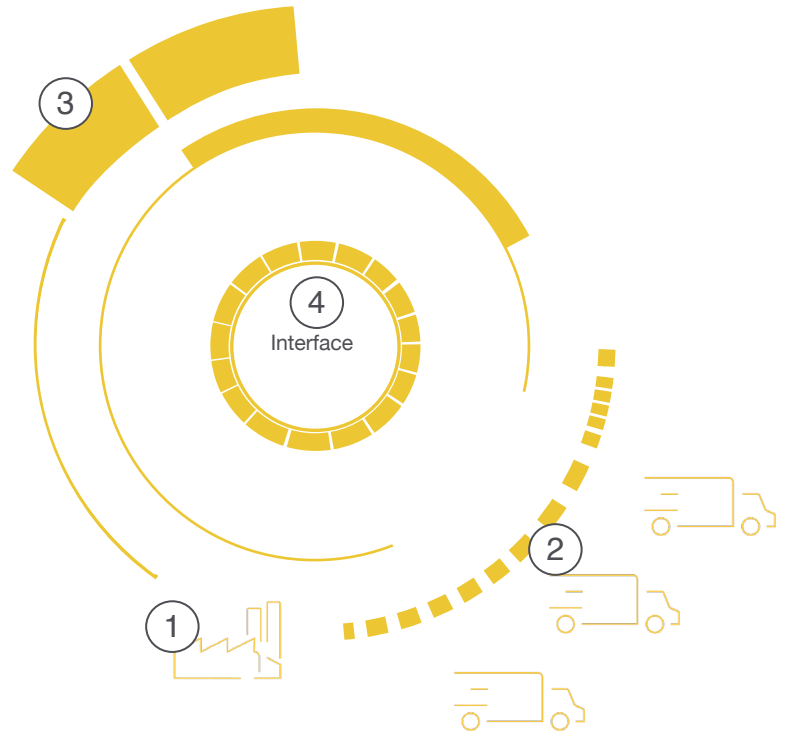

PERMANENT AVAILABILITY AND ISO CERTIFIED

Transporeon is your ISO 27001 certified partner with 100% platform availability. System failures are a thing of the past.

HOW IT WORKS

COMPLETES YOUR SAP TRANSPORTATION MANAGEMENT (SAP TM) SYSTEM LIKE A MISSING PUZZLE PIECE

- 1**
The shipper continues to use the existing SAP TM system for the transport allocation process.
- 2**
Transporeon Logistics Network Connector
- 3**
SAP Transportation Management (SAP TM)
- 4**
The SAP TM interface enables the shipper to access the world's leading logistics network with more than 120,000 carriers directly via SAP TM.

BENEFITS

- 🗨️
} Connect to more than 120,000 carriers with one single vinterface.
- } Your employees work in a familiar environment. No training in a new system is required.
- } Transporeon provides onboarding and worldwide support in 25 languages across multiple time zones.
- } Thanks to comprehensive services, additional modules can be added to the current configuration without great effort. 🗨️
- } As the leading logistics network, Transporeon is a partner with a very high level of acceptance among your transport service providers. 🗨️
- } A platform availability of 100 % ensures permanent access to your transports.
- 🗨️
} Transporeon offers many years of project experience in the connection with SAP.
- } The Transporeon interface is SAP S/4HANA ready.
- } Transporeon is ISO 27001 certified.
