

The Transporeon Add-on for SAP

Experience seamless SAP process integration with the Transporeon Add-on for SAP. The Transporeon Add-on for SAP supplements your SAP system like a missing piece of the puzzle: Integrate full Transporeon functionality seamlessly into your SAP system — without any middleware or complicated integrations.

CHALLENGES

FOR THE LOGISTICS MANAGER

Projects and new business cases usually require a lot of resources, from different departments. Also, new tools usually come with necessary trainings. Time and resources are limited.

FOR THE IT MANAGER

For new business cases, new integrations or software is needed. An unharmonised and difficult to monitor IT landscape is often the result.

FOR THE DISPATCHER AND END USER

Often deals with a variety of tools and GUIs on a daily basis. Needs to switch between several applications for working on the same outbound shipment. This is time consuming and inefficient.
