BUSINESS DEVELOPMENT MANAGER

Facts and figures

▶ 29 years

Decades of expertise:

With 29 years' market experience, Ritex Logistics is synonymous with reliability and excellence.

▶ 150 trucks

Dynamic fleet:

A fleet of 150 MEGA/coilmulde trucks ensures Ritex can meet its clients' diverse logistical needs.

▶ 300 drivers

Skilled workforce:

Its dedicated team of 300 drivers deliver exceptional service.

▶ 300,000 km

Mileage milestone:

Every truck in Ritex's fleet cruises 1.2m km, in four years, averaging 300,000 km per year.

▶ 20,000 m²

State-of-the-art logistics center:

Ritex Logistics Warehouse operates 24/7 and spans 20,000 m². Contained in this vast space are 16,000 pallet places, a 20-tonne overhead crane across 1,900 m² floor space, 950 m² of frigo storage and 21 ramps.

▶ 3 minutes

Rapid response:

Ritex creates tailored solutions in just three minutes, using Transport Assignment's Best Carrier.

Efficient transit times:

Zaragoza, Spain → Gliwice, Poland in 44 hours;
Birmingham, UK → Nitra, Slovakia in just 18 hours.

Adaptability:

Ritex Logistics is open to new partnerships and ready to share its logistics expertise.

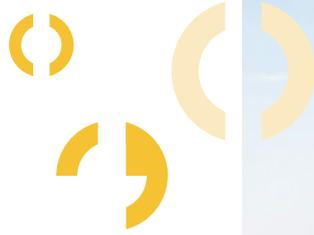

About the customer

Founded in 1994, Ritex Logistics evolved into a logistics operator in 2018, focusing on projects for leading companies in the automotive and construction sectors. Specialising in express road transport, Ritex operates 150 MEGA/coilmulde sets with team drivers, with a preferred corridor of Germany-Spain and Spain-Germany.

Logistics Center Excellence:

The Ritex Logistics Centre in Legnica goes beyond standard warehouse, comprising 20,000 m². It offers diverse capabilities, including high-storage racks, a refrigerated warehouse, and a 20-tonne overhead crane dedicated to heavy steel coils.

The challenges

Managing a large fleet without long-term contracts presented daily challenges. Time-consuming load bookings and processing information from shippers were major hurdles. In this dynamic and ever-evolving industry, Ritex Logistics needed an innovative solution that would help them manage their logistics processes with precision and flexibility.

The solution

Ritex Logistics turned to Transporeon's Transport Assignment to address their operational challenges. This powerful tool optimises freight assignments on a global scale, using three different, innovative solutions. The solution that best suited Ritex Logistics was Best Carrier, which simplifies the spot-buying process. Shippers can share a spot request with their trusted network with a single click, and carriers can then submit their offers. As soon as the shipper's scheduler selects the best offer, the transport is automatically assigned, at the agreed price.

Best Carrier streamlined Ritex's processes, allowing them to directly spot partner transports. This facilitated quick assessments, enabling the company to respond promptly to prevent disruptions in production lines. The integration of GPS transmitters on trucks, connected to the Transporeon Visibility Hub, further enhanced overall transport visibility.

The results

The implementation of Best Carrier yielded significant and tangible results for Ritex Logistics.

The most notable outcome was the huge time savings achieved throughout their operational processes. The system introduced transparency and operational clarity, empowering Ritex to act immediately on assigned loads.

This newfound efficiency was crucial for Ritex, as they focus on critical transports such as pharmaceuticals, automotive and perishable goods, where every second counts. The real-time insights

provided by Transporeon's solution allowed Ritex to allocate resources effectively, optimise responses and minimise downtime, ensuring that their fleet operated at peak efficiency.

The integration also eliminated the need for wasted time on the road, or in the office. Ritex Logistics now operates with a clear and precise understanding of load statuses, allowing them to swiftly make informed decisions. The partnership with Transporeon not only addressed Ritex's initial challenges, but also positioned them at the forefront of efficiency in the competitive logistics landscape.

The future

Ritex plans to continue excelling in critical transports, welcoming new partners into their network.

The company's commitment to responsibly increasing its truck fleet underscores its dedication to reliability and excellence in the logistics sector. Working with Transporeon further consolidates their business and sustainability goals.

The impact of Transporeon

Transporeon proved to be a game-changer for Ritex, providing a unified platform for fast transport support.

Immediate task orders, advance bookings and automatic transport status updates enhanced efficiency. Ritex can now focus on delivering exceptional service to its partners, ensuring they remain at the forefront of the dynamic logistics landscape. The future looks promising for Ritex Logistics as they continue their journey towards operational excellence with Transporeon.
